

Mircea Vasiliniuc

Software Engineering Manager | Lead Mobile Engineer

hello@mircea.app +40745652950 Valencia, Spain / Cluj-Napoca, Romania

https://mircea.app

Summary

A product oriented contributor, a software engineering manager and a long-time promoter of automation, from the early days of scripting to today's AI-driven workflows. My roles included department manager, delivery manager, lead mobile engineer, tech consultant, administrator, co-founder and mentor.

My latest major role involved building a department from the ground up, growing it to 34 specialists while delivering a suite of banking & trading mobile apps reaching 1.2 million users, as we build and maintained more than 50 major features involving over 1 million lines of proprietary code. The department and its products were built on strong foundations, designed to support growth and be resilient to industry shifts.

What I am interested in:

- Digital transformation initiatives
- Building / Leading highly specialised teams
- Complex ecosystems, be it in technology, stakeholder management, operations or market dynamics
- Designing automation while preserving human agency and system integrity / Harness Engineering

Skills

Programming Languages

Swift, ObjC, Kotlin, Python, Bash, C/C++, Java, TypeScript, JavaScript, Rust

Data/Query/Markup Languages

JSON, XML, YAML, SQL, GraphQL, proto, Markdown, html, CSS

Databases

SQLite, CodeData, CloudKit, Firebase Suite, MySQL, PostgreSQL, MongoDB

CI/CD

Gitlab CI/CD, Github Actions, Jenkins, Fastlane

Design Systems

Apple Human Interface Guidelines, Material Design, WCAG2Mobile

Security

OWASP, MASVS, Secure Enclaves, Rooting, Device Binding, Biometrics, Pinning, MiFID II, PSD2/SCA, DPANs

Applied AI

Coding Agents (Codex, Cursor, Claude, Mistral Vibe), MCP, Agentic Skills, Context Engineering, LLM-MAS, RAG

Machine Learning

TensorFlow, CUDA, PyTorch

Experience

iGama Apps Valencia, Spain

Technical consultant Oct 2025 – Present

• Create MCPs exposing regulations (e.g. PSD2) for banking/trading software development or mobile security guidelines (e.g. OWASP MASVS)

• Create templates for agentic safety execution gates

• Create agentic skills to support mobile development

• Consult on the technical recruitment of mobile developers

Nexttech Cluj-Napoca, Romania / Nuremberg, Germany
Apr 2019 – Jul 2025

Head of Mobile Engineering
My goal was to build a solid but versatile department in the Banking & Trading sector, a highly constrained environment that demands sustained focus, collaboration, and proficiency.

First, I was responsible for leading and representing the Mobile Department, consisting of 34 developers across Android and iOS platforms.

Key responsibilities and initiatives included:

• Hiring, recruitment, career development, and performance management.

• Defining and executing the Mobile Department strategy across Android and iOS teams.

• Budget planning and resource allocation.

• Establishing and strengthening cross-department collaboration.

• Designing and implementing internship, onboarding, and technical transition programs.

• Organizing recurring technical sessions on Mobile Engineering and AI toolsets.

• Designing a proficiency framework focused on digital footprint, effort and impact visibility, information transparency, effective communication, and objective assessments.

• Advising on company-wide strategic and organizational decisions.

Lead Mobile Engineer Apr 2019 – Jul 2025
Lead contributor to major banking and trading projects, across development, organizational, and product domains

Key responsibilities and achievements included:

• Led the transition from a legacy codebase to a modern mobile architecture, extending existing features while introducing new technologies, industry-standard capabilities and development practices

• Had a major role in the complete replacement of a massive banking application, from the initial vision through its release

• Designed and coordinated project structures, modularisation strategies (n-tier, domain-driven), dependency management, and structural patterns, in order to maximise development efficiency and future reusability (including AI-Readiness)

• Led key aspects of development processes, quality standards, security guidelines, CI/CD streams, design-to-development handover, feature technical templates

• Contributed to information architecture and feature parity initiatives across platforms

• As part of the core team, led the design and implementation of critical features, including user migration, client onboarding, authentication, authorization, transactions (PSD2)

• Contributed to the business direction of multiple features, impacting user experience, client satisfaction, and conversion rates

• Anticipated and resolved operational and technical bottlenecks (e.g. development environment instability and advanced troubleshooting)

• Coordinated information exchange across teams, within projects involving 40+ active mobile developers and over 100 contributors

• Consulted on and coordinated application replacement, App Stores rollout, release activities, including code freezes, feature flag strategies, UAT, SIT, hypercare periods, hotfix scope and content

• Consistently delivered major project objectives on schedule, with no significant delays or quality issues, receiving positive feedback from both business stakeholders and end users

Delivery Manager Apr 2019 – Jul 2025

Responsible for delivery quality and timelines across the entire Mobile Department consisting in 34 specialists.

Key responsibilities and achievements included:

• Oversaw delivery across multiple banking and trading mobile projects, in which our department accounted for more than 80% of the mobile development capacity.

• Participated in strategic planning and stakeholder discussions, anticipating risks, identifying needs, and proposing solutions.

• Was consulted in aspects related to the overall project team structure, resource allocation, and delivery planning.

• Anticipated and mitigated delivery risks, resolving organizational, technical, and product-related blockers to avoid major delays.

• Organized workshops, focus groups, and external support initiatives to address potential blockers and capability gaps.

• Monitored partner satisfaction, identifying areas for improvement and taking concrete actions to strengthen collaboration.

• Monitored team motivation and took necessary steps to minimize the impact of demotivating factors.

• Maintained effective communication and coordination across Mobile, Product, Services, Content, UI/UX, Business, Compliance, DevOps, and Security teams.

BNP Paribas Personal Investors Nuremberg, Bavaria, Germany

Technical Consultant Feb 2016 – Apr 2019

Technical Lead Feb 2016 – Apr 2019

• Providing Code Management (Migration, Branch management, GIT training sessions).

• Introducing Code Review process.

• Providing development guidelines & samples.

• Providing training session and mentorship.

• Introducing new technologies for mobile development.

• Standardising and expanding unit testing support.

• Providing client-side feature design and overall architecture.

• Improving the process of constructing delivery documentation and API documentation.

• Contributing to release management.

• Supporting customer integration.

• Evaluating iOS developers.

• Interviewing candidates.

• Overall improvement of the development process and team skills.

• Contributing to the innovation efforts of the mobile department.

• Task management and technical ownership.

Senior iOS Developer Feb 2016 – Apr 2019

My second role here was to participate in the development of a suite of iOS customer-facing (B2B) libraries. This mainly involved:

• Developing mobile services related to banking and financial sector

• Developing reusable UI components.

• Designing APIs for integration teams.

• Providing support and maintenance in all sections of the project.

• Participate in the enhancement of a banking and trading application. This mainly involved implementing the following major features:

• Card Management

• Apple Pay Integration (Card Provisioning / Validation, Wallet & PassKit integration)

• Security Features (Privacy Screen Blockers, Data Encryption, Secure User Sessions, Transition to Secure Stores)
https://www.consorsbank.de/home

Garmin Cluj-Napoca, Romania
Senior iOS Developer Sep 2013 – Feb 2016
Mostly involved in the development of Garmin Connect™ Mobile.

Responsibilities and achievements:

• Major UI restructuring, rewriting of critical layers

• Designing and developing new features, in binding server side with the mobile client and establishing design docs used both by iOS and Android.

• Restructuring networking and business layer.

• Maintenance and improvement processes.

• Coordinate the efforts of 4 iOS developers.

• Ensuring cross-team collaboration, the multiple iOS teams around the world and cross departments (Android, Backend, Design, Product).

• Releasing the 2.0 version of GCM, with a new design and significant amount of features, as planned with positive feedback and significant increase in user base.

Most of the development was done in ObjC but some modules needed knowledge of C/C++ for extensions and maintenance.

Team size: 8 members

Technologies involved: Gerrit, JIRA, Xcode toolset, Fabric, Jenkins, C/C++, ObjC.

Mobile architectures used: MVVM, MVP

MoSync AB Cluj-Napoca, Romania / Stockholm, Sweden
Mobile Software Developer Oct 2012 – Nov 2013

- Developing and maintaining parts of the code library used for creating cross-platform mobile applications
- Mostly involved in iOS development but also contributed to feature development on Symbian, Android and Windows Phone side. I mainly worked on the MoSync SDK by adding APIs for Camera, Streaming, UI transitions, location and many others. All these implied working on the C++ wrapper libraries. Also, I helped the MoSync community by providing solutions on the MoSync forum and by writing tutorials and sample applications.
- Worked with C\C++, Objective-C, Java, C#, ruby, Python. Using git as SCM and JIRA for issue tracking.
- Used Scrum framework in development; filling the role of scrum master for a number of cycles was part of my responsibilities.

https://en.wikipedia.org/wiki/MoSync

Garmin Cluj-Napoca, Romania
C/C++ Developer Oct 2021 – Dec 2012

- Developing/maintaining performance measurement tools and identifying/solving performance issues for an automotive based application. Project Duration: 6 months. Team size: 3 members

- Developed and maintained a navigation based application on the bada mobile platform. Involved in developing/re-factoring life-cycle event handling, in client data persistence, in integrating mobility modules, in re-factoring deprecated APIs and in the defect management process. Project duration: 6 months. Team size: 6 members
- Overall worked with: bada C , C\C++, boost, git, Gerrit, Jira, QC, Perforce, Bugzilla, IceScrum. Used Agile methodologies in all the development phases

https://www.garmin.com/ro-RO/

Neusoft Mobile Solutions Cluj Napoca, Romania

Mobile Software Developer Mar 2009 – Oct 2011

Developed and maintained applications for mobile platforms (Symbian, iOS). Worked with: Symbian C++, Qt framework, Objective-C (iOS toolset), Javascript.

Worked on 3 teams.

- One developing and maintaining Nokia Embedded Applications (Ovi Suite), which are Symbian OS applications. This implied using Symbian C++ SDK together with Web Embedding. Team size: 6-8.
- One developing a Mobile Application dedicated to extend Automobile functionality. Implemented from initial phase until release. The app was proprietary product of Neusoft. Used Qt SDK for cross-platform development (C++ based). Team was a 'Scrum Team' and I filled the role of Scrum Master and consulted the PO. Team size: 4-5.
- Last team: iOS Development. Multiple apps developed and released, either proprietary product of Neusoft or for other partners. iOS SDK (Apple ecosystem) was used. Team size: 4

https://www.neusoft.ro

Xoomworks Ltd Cluj-Napoca, Romania

Assistant Programmer Jul 2008 – Jan 2009

- Developing and maintaining a web application for time-sheets (using ASP.NET). Involved in analysis, design and implementation process. Team size: 1 senior coordinator, 2 interns.

Education

Technical University of Cluj Napoca Master of Science - MS

Artificial Intelligence Cluj-Napoca, Romania • Oct 2021 – Jul 2023

In the context of the evolution of LLMs, the resulted thesis outlines the creation process of a GPT-2 model trained on mobile specific datasets, presents a Case Study for applicability of these models in industry-specific tasks and finally discusses implications of these types of tools on the future of the industry.

Publications

Case Study: Using AI-Assisted Code Generation In Mobile Teams Jul 2023

The aim of this study is to evaluate the performance of AI-assisted programming in actual mobile development teams that are focused on native mobile languages like Kotlin and Swift.
